

EPS 211 SAMPLE PAST PAPERS WITH ANSWERS

Question One

a) Using relevant examples, explain the following terms as used in the psychology of learning. (6 Marks)

i) Ineffective coding

Ineffective coding occurs when information is not properly encoded into memory, making retrieval difficult. This often happens due to lack of attention or insufficient processing.

Example: A student trying to memorize a list of words while watching TV may not remember them later because they were not encoded properly.

ii) Motivated forgetting

Motivated forgetting refers to the conscious or unconscious process of forgetting distressing or unwanted memories.

Example: A person who experienced a traumatic event, such as a car accident, may unconsciously suppress details of the event to avoid emotional distress.

iii) Cognitive dissonance

Cognitive dissonance is the mental discomfort that arises when a person holds conflicting beliefs or behaves in a way that contradicts their beliefs.

Example: A student who believes that studying is important but procrastinates may feel guilty and try to justify their behavior by saying they work better under pressure.

b) Distinguish between the following terms as used in the psychology of learning. (4 Marks)

i) Negative reinforcement and punishment

- **Negative reinforcement** involves removing an unpleasant stimulus to encourage a behavior.

Example: A teacher stops giving surprise quizzes when students regularly complete their homework.

- **Punishment** involves introducing an unpleasant stimulus or removing a positive one to discourage behavior.

Example: A student who disrupts class gets detention.

ii) Proactive inhibition and retroactive inhibition

- **Proactive inhibition** occurs when past learning interferes with new learning.
Example: A person who knows Spanish might struggle to learn French due to similarities in vocabulary.
 - **Retroactive inhibition** happens when new learning interferes with old memories.
Example: Learning new phone numbers may cause someone to forget their old ones.
-

c) Explain two functions of attitudes in learning. (4 Marks)

1. **Influence on Motivation:** Positive attitudes towards learning enhance motivation, making students more engaged in their studies.
 2. **Impact on Behavior:** Attitudes affect how students approach learning tasks—those with a growth mindset are more likely to persist in difficult subjects.
-

d) State two characteristics of effective teachers. (2 Marks)

1. **Good Communication Skills:** They explain concepts clearly and encourage student participation.
 2. **Adaptability:** They adjust teaching methods based on students' needs and learning styles.
-

e) State four ways in which the teacher can cause misbehavior in the classroom. (4 Marks)

1. **Lack of Classroom Management:** If rules and expectations are unclear, students may misbehave.
 2. **Unfair Treatment:** Favoritism can create resentment, leading to disruptive behavior.
 3. **Boring Lessons:** Unengaging lessons may cause students to lose interest and act out.
 4. **Overuse of Punishment:** Excessive discipline without positive reinforcement may encourage rebellion.
-

Question Two (20 Marks)

a) Explain four characteristics of a good teacher counselor. (4 Marks)

1. **Empathy:** Understanding students' emotions and challenges without judgment.
 2. **Active Listening:** Paying full attention to students and acknowledging their concerns.
 3. **Confidentiality:** Keeping students' issues private to build trust.
 4. **Problem-Solving Skills:** Helping students find solutions to their academic or personal issues.
-

b) Describe four methods of the psychoanalytic theory that a teacher counselor can use to assist adolescents with low self-esteem. (8 Marks)

1. **Free Association:** Encouraging students to express their thoughts and emotions freely.
 2. **Dream Analysis:** Helping students explore subconscious feelings that may affect their self-esteem.
 3. **Defense Mechanism Awareness:** Identifying negative defense mechanisms (e.g., denial) and replacing them with positive coping strategies.
 4. **Childhood Experience Exploration:** Discussing past experiences that may contribute to low self-esteem and finding ways to address them.
-

c) Discuss the steps towards intervention in relation to exceptional learners. (8 Marks)

1. **Early Identification:** Assessing students for learning difficulties or giftedness.
 2. **Individualized Education Plan (IEP):** Creating customized learning plans based on students' needs.
 3. **Specialized Instruction:** Using appropriate teaching methods, such as visual aids for students with dyslexia.
 4. **Support Services:** Providing counseling, speech therapy, or special education resources.
 5. **Parental Involvement:** Engaging parents in their child's learning process.
 6. **Regular Progress Monitoring:** Assessing and adjusting strategies to ensure effective learning.
 7. **Peer Support:** Encouraging inclusive activities to promote social interaction.
 8. **Teacher Training:** Ensuring teachers are equipped to handle exceptional learners.
-

Question One

a) Using relevant examples, explain the following terms as used in the psychology of learning. (6 Marks)

i) Ineffective coding

Ineffective coding occurs when information is not properly encoded into memory, making retrieval difficult. This often happens due to lack of attention or insufficient processing.

Example: A student trying to memorize a list of words while watching TV may not remember them later because they were not encoded properly.

ii) Motivated forgetting

Motivated forgetting refers to the conscious or unconscious process of forgetting distressing or unwanted memories.

Example: A person who experienced a traumatic event, such as a car accident, may unconsciously suppress details of the event to avoid emotional distress.

iii) Cognitive dissonance

Cognitive dissonance is the mental discomfort that arises when a person holds conflicting beliefs or behaves in a way that contradicts their beliefs.

Example: A student who believes that studying is important but procrastinates may feel guilty and try to justify their behavior by saying they work better under pressure.

b) Distinguish between the following terms as used in the psychology of learning. (4 Marks)

i) Negative reinforcement and punishment

- **Negative reinforcement** involves removing an unpleasant stimulus to encourage a behavior.
Example: A teacher stops giving surprise quizzes when students regularly complete their homework.
- **Punishment** involves introducing an unpleasant stimulus or removing a positive one to discourage behavior.
Example: A student who disrupts class gets detention.

ii) Proactive inhibition and retroactive inhibition

- **Proactive inhibition** occurs when past learning interferes with new learning.
Example: A person who knows Spanish might struggle to learn French due to similarities in vocabulary.

- **Retroactive inhibition** happens when new learning interferes with old memories.
Example: Learning new phone numbers may cause someone to forget their old ones.
-

c) Explain two functions of attitudes in learning. (4 Marks)

1. **Influence on Motivation:** Positive attitudes towards learning enhance motivation, making students more engaged in their studies.
 2. **Impact on Behavior:** Attitudes affect how students approach learning tasks—those with a growth mindset are more likely to persist in difficult subjects.
-

d) State two characteristics of effective teachers. (2 Marks)

1. **Good Communication Skills:** They explain concepts clearly and encourage student participation.
 2. **Adaptability:** They adjust teaching methods based on students' needs and learning styles.
-

e) State four ways in which the teacher can cause misbehavior in the classroom. (4 Marks)

1. **Lack of Classroom Management:** If rules and expectations are unclear, students may misbehave.
 2. **Unfair Treatment:** Favoritism can create resentment, leading to disruptive behavior.
 3. **Boring Lessons:** Unengaging lessons may cause students to lose interest and act out.
 4. **Overuse of Punishment:** Excessive discipline without positive reinforcement may encourage rebellion.
-

Question Two (20 Marks)

a) Explain four characteristics of a good teacher counselor. (4 Marks)

1. **Empathy:** Understanding students' emotions and challenges without judgment.
 2. **Active Listening:** Paying full attention to students and acknowledging their concerns.
 3. **Confidentiality:** Keeping students' issues private to build trust.
 4. **Problem-Solving Skills:** Helping students find solutions to their academic or personal issues.
-

b) Describe four methods of the psychoanalytic theory that a teacher counselor can use to assist adolescents with low self-esteem. (8 Marks)

1. **Free Association:** Encouraging students to express their thoughts and emotions freely.
2. **Dream Analysis:** Helping students explore subconscious feelings that may affect their self-esteem.
3. **Defense Mechanism Awareness:** Identifying negative defense mechanisms (e.g., denial) and replacing them with positive coping strategies.
4. **Childhood Experience Exploration:** Discussing past experiences that may contribute to low self-esteem and finding ways to address them.

c) Discuss the steps towards intervention in relation to exceptional learners. (8 Marks)

1. **Early Identification:** Assessing students for learning difficulties or giftedness.
 2. **Individualized Education Plan (IEP):** Creating customized learning plans based on students' needs.
 3. **Specialized Instruction:** Using appropriate teaching methods, such as visual aids for students with dyslexia.
 4. **Support Services:** Providing counseling, speech therapy, or special education resources.
 5. **Parental Involvement:** Engaging parents in their child's learning process.
 6. **Regular Progress Monitoring:** Assessing and adjusting strategies to ensure effective learning.
 7. **Peer Support:** Encouraging inclusive activities to promote social interaction.
 8. **Teacher Training:** Ensuring teachers are equipped to handle exceptional learners.
-
-

Question One

a) Distinguish the following concepts as applied in psychology of learning. (6 marks)

i) Punishment and negative reinforcement

- **Punishment** involves introducing an unpleasant consequence to reduce undesirable behavior.
Example: A student talking in class gets detention.
- **Negative reinforcement** involves removing an unpleasant stimulus to encourage desired behavior.

Example: A teacher stops giving surprise tests when students consistently complete their assignments.

ii) Echoic and iconic memory

- **Echoic memory** refers to auditory sensory memory that holds sounds for a few seconds.
Example: Remembering the last few words of a conversation even after being distracted.
- **Iconic memory** is visual sensory memory that retains images for a short duration.
Example: Quickly glancing at a billboard and briefly recalling the image.

iii) Self-efficacy and self-regulation

- **Self-efficacy** is an individual's belief in their ability to succeed in a task.
Example: A student confident in their math skills attempts challenging problems.
- **Self-regulation** is the ability to control emotions, behavior, and thoughts to achieve goals.
Example: A student setting a study schedule and following it to prepare for exams.

b) Explain the relevance of psychology of learning to a teacher trainee. (6 marks)

1. **Understanding Learning Styles:** Helps teachers tailor teaching strategies to suit diverse learners.
2. **Behavior Management:** Provides insights into reinforcement and punishment for maintaining discipline.
3. **Motivation Strategies:** Helps teachers encourage students through intrinsic and extrinsic motivation.
4. **Cognitive Development Awareness:** Enables teachers to design lessons appropriate for students' developmental stages.
5. **Special Education Needs:** Helps in identifying and supporting students with learning difficulties.
6. **Effective Communication:** Enhances teacher-student relationships and classroom engagement.

c) Describe the concept of intervention as used in exceptional learning. (6 marks)

Intervention in exceptional learning refers to specialized strategies and support systems designed to help learners with unique educational needs.

1. **Early Identification:** Assessing students with learning difficulties or giftedness.
2. **Individualized Education Plan (IEP):** Creating customized learning plans.

3. **Specialized Teaching Methods:** Using techniques like multi-sensory learning for dyslexic students.
4. **Assistive Technology:** Providing tools such as speech-to-text software for students with disabilities.
5. **Parental and Peer Support:** Encouraging collaboration between teachers, parents, and classmates.
6. **Continuous Monitoring:** Evaluating progress and adjusting strategies accordingly.

d) Explain the conditions that are necessary for social learning to occur. (6 marks)

Social learning, as proposed by Albert Bandura, occurs under the following conditions:

1. **Attention:** The learner must focus on the model's behavior.
2. **Retention:** The learner must remember the observed behavior.
3. **Reproduction:** The learner must have the ability to replicate the behavior.
4. **Motivation:** The learner must have a reason to adopt the behavior (e.g., rewards or consequences).
5. **Modeling:** The presence of a role model demonstrating the behavior.
6. **Reinforcement:** Positive reinforcement strengthens learned behaviors.

e) Explain ways in which a teacher would enhance achievement motivation among learners. (6 marks)

1. **Setting Realistic Goals:** Helping students set achievable academic goals.
2. **Providing Positive Reinforcement:** Encouraging students with praise and rewards.
3. **Creating a Supportive Environment:** Fostering a growth mindset by promoting effort over talent.
4. **Encouraging Autonomy:** Allowing students to take ownership of their learning.
5. **Using Role Models:** Introducing successful figures who overcame challenges.
6. **Providing Constructive Feedback:** Helping students improve without discouraging them.

Question Two

a) Describe how the following may contribute to misbehavior in the classroom. i)

Teachers (5 marks)

1. **Unclear Rules:** Inconsistent or unclear classroom expectations lead to disorder.
2. **Harsh Discipline:** Excessive punishment may encourage defiance.

3. **Lack of Engagement:** Boring lessons cause students to lose focus and misbehave.
4. **Favoritism:** Perceived unfair treatment leads to resentment and disruptive behavior.
5. **Poor Communication:** Misunderstandings between teachers and students can cause conflict.

ii) Students (5 marks)

1. **Peer Influence:** Students misbehave to gain social approval.
2. **Lack of Interest:** Boredom leads to distraction and disruptive behavior.
3. **Personal Issues:** Family problems or stress can affect behavior.
4. **Attention-Seeking:** Some students misbehave to get recognition from teachers or peers.
5. **Lack of Self-Regulation:** Inability to control impulses results in disruptive actions.

Question 3

a) Describe how the principles of psychoanalytic theory may be used for counseling learners. (10 marks)

The psychoanalytic theory, developed by Sigmund Freud, can be applied in counseling learners in the following ways:

1. **Understanding the Unconscious Mind** – Helps in identifying hidden fears or suppressed emotions affecting a student's learning behavior.
2. **Free Association** – Encourages students to express their thoughts freely to uncover underlying issues.
3. **Dream Analysis** – Used to interpret subconscious conflicts affecting a learner's emotional state.
4. **Childhood Experiences** – Recognizing past experiences that may contribute to academic struggles or behavioral issues.
5. **Defense Mechanisms** – Helps students identify mechanisms like repression, denial, or projection that hinder learning.
6. **Emotional Expression** – Provides a safe space for students to express their frustrations and anxieties.
7. **Building Trust** – A teacher or counselor builds rapport with students to encourage openness.
8. **Transference Analysis** – Identifies how students project feelings toward authority figures based on past relationships.
9. **Resolving Inner Conflicts** – Helps students navigate conflicts that impact their self-esteem and motivation.
10. **Developing Coping Strategies** – Guides students in overcoming anxieties and emotional barriers to learning.
- 11.

b) Explain three ways in which a teacher can change learners' negative attitude in a subject. (6 marks)

1. **Making the Subject Engaging** – Using interactive teaching methods such as storytelling, games, and technology to make learning interesting.
 2. **Relating Content to Real Life** – Showing students the practical applications of the subject to increase relevance.
 3. **Providing Positive Reinforcement** – Encouraging students through praise, rewards, and constructive feedback.
-

c) Explain any two principles of counseling. (4 marks)

1. **Confidentiality** – Counselors must ensure that students' personal information is kept private to create a safe and trusting environment.
 2. **Empathy** – Counselors should understand and share the feelings of the learner to provide meaningful support and guidance.
-

Question 4

a) Highlight four causes of personality maladjustment among learners. (4 marks)

1. **Family Issues** – Divorce, neglect, or lack of parental support can cause emotional instability.
 2. **Peer Pressure** – Negative influence from friends can lead to behavioral problems.
 3. **Low Self-Esteem** – Feelings of inadequacy can lead to withdrawal or aggressive behavior.
 4. **Academic Stress** – High expectations or repeated failure can cause frustration and anxiety.
-

b) Explain the importance of affiliative motives in learning. (6 marks)

1. **Encourages Collaboration** – Promotes teamwork and cooperative learning among students.
 2. **Enhances Social Bonds** – Strengthens friendships and peer relationships in the learning environment.
 3. **Increases Motivation** – A sense of belonging boosts confidence and willingness to participate.
 4. **Reduces Anxiety** – Support from peers provides emotional security and reduces stress.
 5. **Improves Communication Skills** – Encourages active discussion and sharing of ideas.
-

6. **Promotes a Positive Learning Environment** – Creates a culture of mutual respect and shared success.
-

c) Describe five strategies that a teacher can use to enhance students' memory. (10 marks)

1. **Repetition and Practice** – Encouraging students to review and practice information multiple times to strengthen retention.
 2. **Use of Mnemonics** – Using acronyms, rhymes, and visualization techniques to aid recall.
 3. **Active Learning Techniques** – Engaging students in discussions, problem-solving, and hands-on activities to reinforce learning.
 4. **Chunking Information** – Breaking down complex information into smaller, manageable sections for easier retention.
 5. **Encouraging Good Study Habits** – Teaching students time management and the importance of rest and a healthy diet to improve cognitive function.
-
-

Question One (COMPULSORY)

a) Identify two ways in which classical conditioning may influence classroom learning. (4 marks)

1. **Association of Stimuli** – If a student consistently experiences anxiety when called to answer questions, they may develop a fear of participation due to associating speaking with stress.
 2. **Emotional Responses** – A pleasant classroom environment can create a positive attitude toward learning, whereas a harsh one may lead to fear or resistance.
-

b) Describe how learners may acquire negative attitudes in a subject through the following: (4 marks)

i. Operant Conditioning – If a student is constantly punished for mistakes in a subject, they may associate the subject with failure, leading to a negative attitude. **ii. Direct Experience** – A student who struggles with a subject and repeatedly fails tests may develop frustration and avoidance, reinforcing their dislike for the subject.

c) Explain two roles played by rehearsal in promoting memory in learners. (4 marks)

1. **Enhances Retention** – Repeating information multiple times strengthens neural pathways, making recall easier.
2. **Transfers Information to Long-Term Memory** – Rehearsal helps move information from short-term to long-term memory, allowing for better knowledge retention.

d) Explain two ways in which a teacher would enhance citizenship while teaching in a class that has exceptional learners. (4 marks)

1. **Encouraging Inclusivity** – Promoting equal participation and collaboration among all learners, including those with exceptional needs, to foster a sense of community.
2. **Teaching Civic Responsibility** – Instilling values such as respect, teamwork, and responsibility to prepare learners for active citizenship.

e) Describe the following concepts as used in psychology of learning: (4 marks)

i. Successive Approximation – A technique in behavioral learning where a complex behavior is taught through gradual steps, reinforcing each stage of progress. **ii. Counseling** – A psychological process that helps learners cope with emotional, social, and academic challenges through guidance and support.

Question Two (20 MARKS)

a) Imagine that you have been invited as a guest speaker to talk about reasons why learners may be demotivated in a subject. Identify five points that you will include in your speech. (10 marks)

1. **Lack of Interest** – Students may not find the subject engaging or relevant to their lives.
2. **Negative Past Experiences** – Previous failures or harsh criticism can lead to loss of confidence and motivation.
3. **Ineffective Teaching Methods** – Monotonous or unclear explanations can make learning difficult and frustrating.
4. **Lack of Encouragement** – Absence of positive reinforcement from teachers and parents can demotivate learners.

5. **Peer Influence** – Negative peer pressure or teasing can discourage students from putting effort into a subject.
-

b) Explain five self-regulation strategies that you can use to promote learning in a classroom. (10 marks)

1. **Goal Setting** – Encouraging students to set academic and personal learning objectives to stay motivated.
 2. **Self-Monitoring** – Teaching students to track their own progress and reflect on their learning strategies.
 3. **Time Management** – Helping students develop schedules and prioritize tasks for effective studying.
 4. **Cognitive Reappraisal** – Training learners to reframe negative thoughts about challenges into growth opportunities.
 5. **Seeking Help** – Encouraging students to ask for assistance from teachers, peers, or resources when facing difficulties.
-

QUESTION THREE

a) Explain four reasons why a teacher requires knowledge in classroom management. (8 marks)

1. **Maintains Order and Discipline** – Classroom management skills help create a structured learning environment, minimizing disruptions.
 2. **Enhances Effective Learning** – A well-managed class allows smooth lesson delivery, ensuring students stay focused and engaged.
 3. **Promotes Positive Student-Teacher Relationships** – Good management fosters mutual respect and cooperation, improving classroom interactions.
 4. **Encourages Student Responsibility** – When teachers set clear expectations, students learn self-discipline and accountability.
-

b) Explain as a teacher how you would use the following behavior modification strategies to manage learner discipline: (8 marks)

- i. **Token Economy** – Rewarding students with tokens (such as points or stickers) for good behavior, which they can exchange for privileges, reinforces positive conduct.

- ii. **Contracting** – Creating behavior agreements between the teacher and the student, outlining expected behavior and consequences for misbehavior, promotes accountability. iii. **Extinction** – Ignoring disruptive behavior (such as attention-seeking outbursts) to reduce its occurrence over time.
- iv. **Promoting Discipline** – Using consistent and fair disciplinary measures, such as reinforcement of rules and appropriate consequences, to shape behavior positively.

c) Suggest four home-based factors that may contribute to learner behavior problems in class. (4 marks)

1. **Parental Neglect** – Lack of parental supervision and support can lead to indiscipline in school.
2. **Domestic Violence** – Exposure to family conflicts can cause emotional distress, leading to aggressive or withdrawn behavior.
3. **Poor Socioeconomic Background** – Financial struggles at home can result in stress, affecting concentration and behavior in class.
4. **Negative Role Models** – Learners may imitate bad behavior from family members, such as dishonesty, aggression, or disrespect.

QUESTION FOUR (20 MARKS)

a) Explain four characteristics of a learner who has high self-efficacy in your subject. (10 marks)

1. **Perseverance** – A student with high self-efficacy does not give up easily when faced with challenges.
2. **Confidence in Abilities** – They believe in their capability to understand and succeed in the subject.
3. **Willingness to Take on Difficult Tasks** – Such learners are eager to tackle complex problems rather than avoiding them.
4. **Use of Effective Learning Strategies** – They actively seek help, practice regularly, and employ problem-solving techniques.

b) Explain four conditions that are necessary for social cognitive learning to occur among learners. (8 marks)

1. **Attention** – The learner must focus on the model (teacher, peer, or media) to observe behavior accurately.

2. **Retention** – The observed behavior must be remembered for it to be reproduced later.
 3. **Reproduction** – The learner must have the ability to imitate or practice the observed behavior.
 4. **Motivation** – There must be a reason (such as rewards or personal goals) for the learner to perform the learned behavior.
-

c) Explain the concept of insightful learning. (2 marks)

Insightful learning occurs when a learner suddenly realizes the solution to a problem by understanding the relationships between different elements, rather than through trial and error. It is associated with problem-solving and deep comprehension rather than rote memorization.

QUESTION ONE

a) Explain three characteristics of a good teacher counselor. (6 marks)

1. **Empathy** – A good teacher counselor understands and shares the feelings of students, providing emotional support.
 2. **Effective Communication** – They actively listen and communicate clearly to help students express their concerns.
 3. **Confidentiality and Trustworthiness** – A good counselor maintains student confidentiality, fostering trust and openness.
-

b) Differentiate between mastery goals and performance goals orientations. (4 marks)

- **Mastery Goals** – Focus on understanding and improving competence in a subject, emphasizing learning for personal growth.
 - **Performance Goals** – Aim to demonstrate competence relative to others, often focusing on external validation like grades or recognition.
-

c) Describe two causes of personality maladjustment among learners. (4 marks)

1. **Negative Social Experiences** – Bullying, discrimination, or peer rejection can lead to emotional distress and maladjustment.
 2. **Family Issues** – Parental neglect, abuse, or inconsistent discipline can disrupt personality development and cause maladaptive behaviors.
-

d) Suggest three ways in which insightful learning is relevant to Competence-Based Education. (6 marks)

1. **Problem-Solving Skills** – Insightful learning helps students develop the ability to analyze and solve real-world problems independently.
 2. **Application of Knowledge** – Encourages learners to connect concepts across different subjects, making education more practical.
 3. **Encourages Creativity** – Promotes critical thinking and innovation, essential for skill-based and competence-driven education.
-

QUESTION TWO

a) Using classroom examples, explain three methods that a teacher can use to enhance transfer of learning among learners. (6 marks)

1. **Use of Real-Life Examples** – Relating classroom concepts to real-world situations (e.g., using budgeting exercises in math) helps learners apply knowledge outside school.
 2. **Scaffolding** – Breaking down complex ideas into simpler steps allows gradual mastery and easier transfer to new contexts.
 3. **Encouraging Reflection** – Asking students to reflect on past lessons (e.g., discussing how a historical event relates to current affairs) promotes deeper learning.
-

b) Explain three causes of individual differences in learning. (6 marks)

1. **Cognitive Abilities** – Learners have different levels of intelligence, memory capacity, and problem-solving skills.
 2. **Learning Styles** – Some students prefer visual learning, while others benefit from auditory or kinesthetic approaches.
-

3. **Environmental Factors** – Access to resources, parental support, and socio-economic background affect learning abilities.
-

c) Explain four essential steps for observational learning to occur. (8 marks)

1. **Attention** – The learner must focus on the model's behavior to absorb information.
 2. **Retention** – The observed behavior must be stored in memory for later use.
 3. **Reproduction** – The learner must have the ability to replicate the observed action.
 4. **Motivation** – There must be a reason (reward, personal interest) to imitate the behavior.
-

QUESTION THREE

a) Discuss five guidelines that can be used to make punishment effective in schools. (6 marks)

1. **Consistency** – Punishment should be applied fairly and consistently for all students.
 2. **Immediate Consequences** – Should be given soon after the misbehavior to reinforce cause-effect understanding.
 3. **Proportionality** – The severity of the punishment should match the misbehavior.
 4. **Positive Reinforcement** – Encouraging good behavior alongside punishment prevents resentment.
 5. **Clear Rules and Expectations** – Students should understand school rules to avoid unintentional punishment.
-

b) Identify four characteristics of an effective teacher. (8 marks)

1. **Good Communication Skills** – Explains concepts clearly and listens to students' concerns.
 2. **Patience and Understanding** – Adjusts teaching approaches based on students' needs.
 3. **Subject Mastery** – Has in-depth knowledge of the subject being taught.
 4. **Classroom Management Skills** – Maintains discipline and a productive learning environment.
-

c) Explain three ways in which feedback is necessary in the teaching-learning situation.

(6 marks)

1. **Encourages Improvement** – Helps students identify mistakes and learn from them.
 2. **Boosts Motivation** – Positive feedback reinforces effort and builds confidence.
 3. **Guides Learning** – Provides direction on what students need to focus on or improve.
-

QUESTION FOUR

a) Explain three sources of self-efficacy among learners. (6 marks)

1. **Mastery Experiences** – When students successfully complete tasks, they build confidence in their abilities, increasing self-efficacy.
 2. **Vicarious Experiences (Observational Learning)** – Observing peers successfully perform a task boosts a learner's belief that they can also succeed.
 3. **Social Persuasion** – Encouragement and positive feedback from teachers, parents, and peers enhance learners' self-efficacy.
-

b) Using relevant examples, describe three methods that you can use in learners to change negative attitudes towards your subject. (6 marks)

1. **Use of Real-Life Applications** – Demonstrating how the subject is relevant to daily life (e.g., showing how mathematics applies to budgeting) helps learners appreciate its importance.
 2. **Engaging and Interactive Teaching Methods** – Incorporating group discussions, hands-on activities, and technology makes learning more enjoyable and reduces negative attitudes.
 3. **Positive Reinforcement** – Praising and rewarding progress (e.g., recognizing students who improve their performance) helps build a positive mindset toward the subject.
-

c) Discuss four techniques of behavior modification in class. (8 marks)

1. **Positive Reinforcement** – Rewarding desired behaviors with praise, privileges, or tangible rewards encourages their repetition.
 2. **Negative Reinforcement** – Removing an unpleasant stimulus when the desired behavior occurs (e.g., reducing homework for well-behaved students) strengthens good behavior.
 3. **Punishment** – Applying consequences for undesirable behaviors, such as extra assignments or temporary loss of privileges, discourages misbehavior.
-

4. **Modeling** – Demonstrating appropriate behavior for students to imitate fosters positive behavioral change.
-

Question One (Compulsory) – 20 Marks

a) Using relevant examples, explain the following terms as used in psychology of learning. (6 Marks)

1. **Ineffective Coding** – This occurs when information is not properly stored in memory, leading to forgetting. For example, if a student is distracted while studying, they may not encode the information effectively and will struggle to recall it later.
 2. **Motivated Forgetting** – This is when individuals deliberately or unconsciously suppress memories, often due to their emotional distress. For example, a student may forget a traumatic experience such as failing an exam to reduce anxiety.
 3. **Cognitive Dissonance** – This occurs when a person experiences psychological discomfort due to conflicting beliefs or behaviors. For example, a student who values honesty but cheats on a test may feel internal tension and seek to justify their actions.
-

b) Distinguish between the following terms as used in psychology of learning. (4 Marks)

1. **Negative Reinforcement vs. Punishment** ○ Negative reinforcement strengthens a behavior by removing an unpleasant stimulus (e.g., a teacher stops giving extra assignments when students complete classwork on time).
 - Punishment decreases the likelihood of a behavior by introducing an unpleasant consequence (e.g., giving detention for lateness).
 2. **Proactive Inhibition vs. Retroactive Inhibition** ○ Proactive inhibition occurs when old information interferes with the learning of new information (e.g., a student who previously learned French struggles to learn Spanish due to language similarities).
 - Retroactive inhibition occurs when new information disrupts the recall of previously learned information (e.g., after learning Spanish, a student forgets some French vocabulary).
-

c) Explain two functions of attitudes in learning. (4 Marks)

1. **Motivation** – A positive attitude towards a subject increases a student's willingness to learn, leading to better performance.
-

2. **Influencing Behavior** – Attitudes shape how learners interact with their studies, teachers, and peers, affecting participation and engagement.
-

d) State two characteristics of effective teachers. (2 Marks)

1. **Good Communication Skills** – Effective teachers clearly explain concepts, making learning easier for students.
 2. **Adaptability** – They modify teaching strategies to meet the diverse needs of learners.
-

e) State four ways in which the teacher can cause misbehavior in the classroom. (4 Marks)

1. **Inconsistent Discipline** – When teachers enforce rules unfairly or inconsistently, students may rebel.
 2. **Lack of Engagement** – Boring lessons can lead to students becoming disruptive.
 3. **Negative Reinforcement** – Encouraging bad behavior by giving in to student demands reinforces misconduct.
 4. **Public Humiliation** – Shaming students in front of peers can lead to defiant behavior.
-

Question Two – 20 Marks

a) Explain four characteristics of a good teacher counselor. (4 Marks)

1. **Empathy** – Understanding students' feelings and experiences helps provide effective guidance.
 2. **Active Listening** – Paying full attention to students' concerns builds trust and promotes open communication.
 3. **Non-Judgmental Attitude** – Encouraging students to express themselves freely without fear of criticism.
 4. **Problem-Solving Skills** – Helping students identify challenges and develop strategies to overcome them.
-

b) Describe four methods of the psychoanalytic theory that a teacher counselor can use to assist adolescents with low self-esteem. (8 Marks)

1. **Free Association** – Encouraging students to express their thoughts and feelings without fear of judgment.
 2. **Dream Analysis** – Helping students explore unconscious thoughts through their dreams.
 3. **Catharsis** – Allowing students to release suppressed emotions to reduce anxiety and boost self-esteem.
 4. **Defense Mechanism Awareness** – Teaching students how unconscious strategies like denial or projection impact their self-perception and behavior.
-

c) Discuss the steps towards intervention in relation to exceptional learners. (8 Marks)

1. **Identification and Assessment** – Recognizing students with special needs through observation and testing.
 2. **Individualized Education Plan (IEP)** – Creating a personalized learning plan based on the student's strengths and weaknesses.
 3. **Specialized Instruction** – Using teaching strategies that cater to different learning abilities, such as visual aids or hands-on activities.
 4. **Collaboration with Stakeholders** – Working with parents, psychologists, and special educators to provide holistic support.
 5. **Progress Monitoring** – Regularly assessing the student's performance and adjusting strategies accordingly.
-
-

Question Three (20 Marks)

a) Explain four qualities of a psychologically healthy learner. (4 Marks)

1. **Self-confidence** – A psychologically healthy learner believes in their abilities and approaches learning tasks with a positive mindset.
 2. **Emotional Stability** – The learner can manage stress, anxiety, and frustration, which helps in effective learning.
 3. **Intrinsic Motivation** – A healthy learner is driven by curiosity and a desire to learn rather than external rewards.
 4. **Resilience** – The learner can cope with setbacks and persist in the face of academic challenges.
-

b) Discuss four factors that influence self-regulated learning. (8 Marks)

1. **Goal Setting** – Learners who set clear academic goals tend to stay focused and motivated.
2. **Metacognition** – The ability to plan, monitor, and evaluate one's learning process enhances self-regulated learning.
3. **Time Management** – Effective organization and prioritization of tasks contribute to better learning outcomes.
4. **Self-Efficacy** – A learner's belief in their ability to succeed influences how much effort they put into their studies.

c) Explain the application of the self-determination theory of motivation to learning. (8 Marks)

The **Self-Determination Theory (SDT)** suggests that motivation is driven by three key psychological needs:

1. **Autonomy** – When students have control over their learning, they become more engaged and motivated. For example, allowing learners to choose their projects increases ownership.
2. **Competence** – Providing students with achievable challenges and constructive feedback enhances their confidence and willingness to learn.
3. **Relatedness** – Positive relationships with teachers and peers foster a supportive learning environment, increasing motivation.

Teachers can apply SDT by fostering autonomy, providing mastery-oriented tasks, and creating a supportive classroom culture.

Question Four (20 Marks)

a) Explain four characteristics of a learner experiencing learned helplessness. (4 Marks)

1. **Low Motivation** – The learner gives up easily and lacks the drive to attempt tasks.
2. **Avoidance of Challenges** – They avoid new or difficult tasks due to fear of failure.
3. **Negative Self-Perception** – The learner believes they are incapable of success, leading to self-doubt.
4. **Passive Behavior** – Instead of trying to improve, they rely on others to solve their problems.

b) Discuss four principles under which classical conditioning operates. (8 Marks)

1. **Acquisition** – The process of learning the association between a neutral stimulus and an unconditioned stimulus. For example, students associating a bell with the end of class.
2. **Extinction** – When the conditioned response fades if the conditioned stimulus is repeatedly presented without reinforcement.
3. **Generalization** – A learned response to one stimulus is transferred to similar stimuli. For example, a student fearing all math problems after struggling with algebra.
4. **Discrimination** – The ability to differentiate between similar stimuli and respond only to the conditioned one. For example, a student responding only to their teacher's instructions and not to general classroom noise.

c) Explain how a teacher would use the following methods of behavior modification in the teaching-learning process. (8 Marks)

1. **Preventive Discipline** – Teachers establish clear rules and expectations at the beginning of the term to prevent misbehavior before it starts.
 2. **Token Economy** – Rewarding students with tokens (e.g., stars, stickers) for good behavior, which can be exchanged for privileges, reinforces positive actions.
 3. **Contracting** – Teachers and students create behavioral agreements outlining expectations and consequences, encouraging accountability.
 4. **Extinction** – Ignoring disruptive behavior that is attention-seeking (e.g., not reacting to a student who interrupts) to reduce its occurrence.
-
